To Whom It May Concern,

Divan interned with the Sharks Rugby creative team from January to May 2024. And during this time, we worked closely together on animations for the screens around the stadium, along with social media campaigns with very short turnaround time.. He surprised us by working late into the evenings on occasions to try get projects ready for review first thing in the morning. He has allot of creativity that will be fine-tuned over time, hardworking, and generally good person to be around with a good outlook on life.

Divan handled tasks like creating graphics for social media, and helping with our overall visual branding. He really captured the Sharks Rugby vibe. Coming up with totally different illustrations that isn't typically seen in the field.

He's got a good understanding of the entire Adobe Creative Suite, especially After effects, Illustrator etc. Divan has a great eye for detail and can turn ideas into awesome designs. One of his best projects was an animation for a game against ASM Claremont where he created a animation from scratch drawing all the players and creating a fun vibey video. Unfortunately time wasn't really on his side to get the project fully out in time, but it got great feedback from everyone. He also helped out with photography and getting us nice gopro footage on the field during game days.

Divan was a joy to work with. He communicated well, took feedback in stride, and worked smoothly with our marketing and media teams. His positive attitude and willingness to learn were clear every day. I'm confident that Divan will be a great addition to any team. I highly recommend him and wish him all the best.
